SUMMARY

Informatics graduate with hands-on experience in IT support, systems maintenance, and data processing. Proficient in Python, SQL, and modern hardware/software troubleshooting with a proven ability to optimize technical operations. A resourceful problem solver eager to contribute technical adaptability and analytical skills to entry-level IT, software, or technology support roles.

WORK EXPERIENCE AND PROJECT

Data Analyst & IT Support Intern | PT. Asia Adhitama Shipyard Nov 2025 - Mei 2026

- Processed and analyzed large-scale shipyard operational data using Python, Pandas, and Excel to significantly improve the accuracy of daily management reports.
- Monitored time-sensitive docking schedules and mapped end-to-end repair workflows (e.g., waterjet cleaning, gas freeing) across multiple vessel projects to identify and resolve operational bottlenecks.
- Translated technical data into actionable reports, facilitating cross-departmental decision-making and data validation with Admin, HSE, QA/QC, Purchasing, and Legal teams.
- Delivered comprehensive IT support by troubleshooting hardware, software, and network issues, ensuring seamless daily operations across the shipyard.

IT Support Intern | Dinas Koperasi UMKM dan Perindustrian Balikpapan Nov 2024 - Jan 2025

- Delivered IT support for office users, including hardware, software, printer, scanner, and network troubleshooting.
- Assisted in maintaining daily office operations through technical issue resolution and device support.
- Supported software installation, system configuration, file management, data backup, and document digitization.
- Helped improve administrative efficiency using Microsoft Office, Google Workspace, and basic IT documentation.

CMS Developer Intern | SMK Kartika V-1 Balikpapan Jan 2024 - Mar 2024

- Maintained and updated the official school website using WordPress, including academic information and news content.
- Customized themes and managed plugins to improve website functionality, security, and user experience.
- Coordinated with teachers and administrative staff to ensure accurate and timely publication of information.
- Performed troubleshooting and routine maintenance to ensure website stability and accessibility.

AI Research Project (Final Thesis): Open-Set Recognition for Plant Species Jan 2025 - Jun 2025

- Developed an open-set recognition system for plant species classification using Quad-Channel Contrastive Prototype Networks and MobileNetV3-Large.
- Performed hidden layer analysis and hyperparameter tuning to improve model performance and generalization.
- Achieved 91.59% accuracy on known classes and 0.8963 AUROC for unknown class detection.
- Built a lightweight inference pipeline with real-time latency ranging from 3.35 ms to 28.60 ms.
- Tech Stack: Python, PyTorch, MobileNetV3, Google Colab, GitHub.

AI Application Project: Organic & Inorganic Waste Classification (Trashify) Aug 2024 - Des 2024

- Built an end-to-end image classification pipeline, including data collection, labeling, model training, and evaluation.
- Trained a CNN-based model with transfer learning and data augmentation, achieving 90% validation accuracy.
- Converted the trained model into .h5 format for mobile deployment and real-time inference.
- Developed a Flask-based backend API to serve image classification requests from a mobile application.
- Tested API functionality, accuracy, and performance across multiple scenarios using Postman.
- Tech Stack: Flutter, Python, Flask, TensorFlow/Keras, Scikit-learn, Pandas, Postman.

Mobile App Project: Speak2Text (Voice-to-Text)

Aug 2023 – Dec 2023

- Developed and deployed a voice-to-text mobile application using Flutter, covering the full process from requirements analysis to deployment.
- Implemented speech-to-text functionality to convert audio input into text accurately.
- Applied Agile Scrum practices through sprint planning, weekly progress reviews, and iterative development.
- Published the application on Google Play Store.
- Tech Stack: Flutter, Dart, Google API, GitHub, Trello.
- Link: play.google.com/store/apps/details?id=com.apprelease.speak2text

EDUCATION

INSTITUT TEKNOLOGI KALIMANTAN

Aug 2021 – Jul 2025

Bachelor of Informatics | GPA: 3.29/4.00

ORGANIZATION

HMIF ITK

Sept 2023 – Sept 2024

Head of Student Association Enterprise (BUMH)

- Led the student business unit in planning and executing entrepreneurship initiatives to support organizational funding.
- Managed business operations, including production planning, inventory control, and merchandise sales.
- Oversaw financial records and prepared periodic profit reports for the executive board.
- Built and maintained relationships with vendors and external partners to support business sustainability.

SKILLS

- **Programming Languages:** Python, Java, JavaScript, PHP, Kotlin, TypeScript, HTML, CSS, SQL, Dart.
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase.
- **AI & Machine Learning:** PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, Computer Vision (Open-Set Recognition), Convolutional Neural Networks (CNN), Transfer Learning.
- **Frameworks & Libraries:** Flutter, Flask, React.
- **DevOps & Cloud:** Google Cloud Platform (GCP), Docker, Kubernetes.
- **Tools & Platforms:** Git, GitHub, Trello, Miro, Figma, Google Colab, Microsoft Office, Canva.
- **Soft Skills:** Problem-Solving, Analytical & Critical Thinking, Teamwork, Adaptability.
